- **Programming Languages:** JavaScript ES6+, SQL, HTML5, CSS3, jQuery
- **Operating Systems:** Windows 10, macOS, iOS, Android
- **Database:** MySQL, MongoDB, SQL Server, Express
- **Software:** SQL, MongoDB, VS Code, React, NPM, NodeJS; MS Word, Outlook, Teams, Excel, Powerpoint

WORK EXPERIENCE

Software Support @ HomeGauge Software

October 2023 - Present

- Diagnose and resolve complex software issues by using technical documentation, internal resources, and a developed understanding of our products.
- Actively participate and lead in cross-departmental meetings, providing insights from a customer support perspective to inform web development strategies and business decisions.
- Use industry standard software including Zendesk for customer management and Microsoft Office for data analysis and document creation, enhancing operational efficiency.

Real Estate Associate @ Redfin

August 2019 – May 2021

- Utilized proprietary software to streamline the home buying and selling process, enhancing client experience by reducing stress and increasing success and sale rates.
- Leveraged advanced digital tools to develop and maintain strong professional relationships with clients, ensuring high satisfaction and streamlined processes.
- Employed data analysis and software solutions to optimize client interactions and transactions, demonstrating a keen understanding of technology in a real estate context.

PROJECT EXPERIENCE

Market Dash - tinyurl.com/market-dash

Developed in 2023

Developer, Emphasis on AI Integration & Back-End Development

- Created a highly responsive AI powered marketing tool to allow farmers market vendors to promote their products and shoppers to preview the market with the help of my custom AI assistant.
- Developed the unique AI assistant for the project becoming the first student ever in the bootcamp to develop a chatbot with back-end data integration.
- Incorporated OpenAI API, GraphQL, MongoDB, React, Tailwind CSS, Apollo Server and Client, NodeJS, and NPM into an interactive website for vendors and shoppers.

The Vault - tinyurl.com/the-vault-password-saver

Developed in 2023

Sole Developer, Emphasis on HTML/CSS & Back-End Encryption

- Engineered an encrypted password saver application, enabling secure online and offline password storage, utilizing full-stack development skills from HTML/CSS to backend encryption.
- Demonstrated versatility across all technical aspects of the project, employing NodeJS, Bootstrap, Handlebars, and MVC architecture for a seamless user experience.
- Focused on robust security measures, integrating advanced encryption techniques to protect user data, showcasing a strong understanding of security in software development.

PERSONAL INTERESTS & VOLUNTEERING

- Outside of work, I regularly attend church and serve there, assisting with our church missions and goals. I also enjoy expressing my creativity through, most recently, ceramics and writing. Personal interests of mine include blockchain and Ethereum, real estate, traveling, cooking, and exercises such as weight lifting and hiking.
